

Imagine How You'll Feel WITHOUT 100's of Stones in Your Liver!

WORKED JUST AS YOU SAID. PASSED OVER 200 GREEN STONES

Paul Oberdorf: I'm so thankful for your advice on the Liver flush. I feel so relaxed and full of life. It worked just as you said it would. I passed over two hundred olive green stones, the biggest were about the size of a marble, about ten, the rest were pea size and smaller. I had been experiencing pain on my right side for over five years, and the pain left the day after the flush. I am passing your info on to those looking for better health and life. Thank god for people like you.

500 STONES IN 2 LIVER FLUSHES

Paul, did the liver flush and passed over 300 stones, pea sized to size of a walnut. I feel much better and pain went away. A month later another flush passed 200 stones.

SLIM WOMAN PASSED 1,000 STONES IN ONE FLUSH

I am a slim woman who works for Paul Oberdorf and decided to do the liver flush after another employee passed about 50 stones and said it was a piece of cake. It wasn't for me. I was in much discomfort and felt weak for a few days. But it was shocking to me as I passed nearly 1,000 stones, about 200 each time I went to the bathroom. I couldn't believe that was inside me as I'm slim. I'm ecstatic to have gotten rid of it. Now I feel great.

7 LIVER FLUSHES, STILL STONES

My 7th liver flush and still some stones, some large as marbles. It's hard to believe all the stones I got out.

MD, COMPLIMENTARY MEDICINE

Thanks again for your True Health & Healing. I have excellent results with colloidal silver for infection and pneumonia. The liver flush is a godsend with nonsurgical relief. After I, my wife and my patients did it, I am convinced it is safe and effective in cleansing the gallbladder, liver and entire body that results in energy and stamina galore!

HEALTH CLINIC

Mr. Oberdorf, I am intrigued the way you put together a basic foundation of information to help people reverse their health conditions.

PEAS, CHERRIES, WALNUT SIZE

Paul, the liver flush worked just as you said, mostly green peas, a few size of cherries, one walnut size.

CAN'T BELIEVE HOW GREAT I FEEL

Passed 200 stones, one dime size. Can't believe how great I feel.

4 FLUSHES, LIVER IS CLEAN

After my fourth liver flush my liver is clean. No more stones came out after passing hundreds in 3 flushes.

500 STONES CAME OUT OF LIVER

A friend of mine had gallstones and did the liver cleanse. She saw about 500 stones come out of her and now has more energy than ever.

CANCELS GALLBLADDER SURGERY

My gallbladder was painful for months. My doctor scheduled surgery. I did the liver flush and passed stones. I called the doctor, cancelled the operation, said I'm fine, don't need it. He was furious.

CURED ALLERGIES, ELIMINATED 2 CUPS OF STONES

In search for a cure for allergies, a friend did the liver cleanse eight times and got rid of at least 2 cups of stones.

MEMORY RETURNED IMMEDIATELY

After the liver flush my memory immediately came back like the old days. I now see numbers and don't forget.

ABOUT 500 STONES CAME OUT

I did the liver flush and got out about 500 stones. The liver and gallbladder dump stones into the intestines thru the bile ducts. I did not use the Epsom salts and I felt my liver spasm. The ortho-phos drops softens the stones.

FACED SURGERY UNTIL LIVER FLUSH RELIEVED HIM OF THOUSANDS OF STONES

Benefits are immeasurable. The liver cleanse relieved me of 1000's of stones from my liver and gallbladder. If not for the cleanse, I feel sure I would have faced surgery.

PRODUCED 500 SMALL STONES

I finished my second liver cleansing... no pain or discomfort. The first produced about 500 small stones, 5 to 10 bigger ones (like small peanuts) and a lot of chaff. The second flush about 200 small stones, about 20 big ones.

SAVED FROM LUNG DISEASE

One therapist swears she saved two people from a serious lung problem. It was a miracle.

AMAZED IT WORKED AS WE SAID

I was amazed to find it worked exactly like you said. It's really hard to believe I passed 35 stones, especially since 32 stones were removed before in gall bladder surgery.

SYMPTOMS DISAPPEARED WITH LIVER FLUSH

I did not realize that by doing a liver flush I could have better body functions. After the first flush my symptoms disappeared and never returned. I now do a flush every 12-16 weeks to keep stones and cholesterol out of the liver. Helps in all phases of my life.

5 LIVER FLUSHES, 1,000 STONES

The real thing was the liver cleanse. My symptoms disappeared, feel lighter, more energetic. 5 flushes got out 1,000 stones, most green or tan, some as large as marbles.

THREE DOCTORS SAYS IMPOSSIBLE TO CLEANSE LIVER

After doing the cleanses, especially the liver, I haven't had any symptoms in over 6 months. I have friends who did it and recovered. Maybe doctors will finally start using this, but 3 doctors I mentioned it to said that it is impossible to clean out the liver. Huh?

SO MANY HAVE A CLOGGED LIVER

Tried the liver flush after feeling bloated, loss of appetite and pressure in my abdomen. I finished my 2nd cleanse and already see results, expelled many stones, pressure subsided and my appetite back. A friend tried it with the same results. He couldn't believe the stones he passed. I thought about all those people with clogged up bile ducts and unaware of the health risk of a liver not functioning properly.

14 YEARS OF TREMBLING GONE

A man was trembling constantly for 10 years. After 2 flushes he was able to return to work regularly.

OVER 1,000 STONES, CANCELLED GALL BLADDER OPERATION

My elderly father in Jamaica was scheduled for a gall bladder operation. I insisted he do the liver flush and he was in shock as over 1,000 stones came out. Needless to say he is ecstatic and cancelled the operation.

LOWER CHOLESTEROL

My cholesterol is high and I heard your liver flush will bring it down.

Nathalie Tucker, Chiropractor, got such great results with the Liver Flush, she put her patients on it. "Everyone passed at least 100 liver stones."

How was your first liver flush?

It was an explosion! 2 to 3 stones, then 50 stones 30 minutes later. Each time more and more stones appeared. I passed over 250 stones. The next flush another 100. The only way you can get stones out is to flush them out.

How big were the stones?

Some were the size of cherries, others a pin head. The bigger ones came out first, then the smaller. They were like green peas, soft and a little bit oily. You don't feel anything.

How did you feel after the flush?

The following day, I felt a surge of energy. I felt great. Everything about the liver flush was true. It's just unbelievable how good it makes you feel.

How often did you go on the flush?

Four times a year. Before that I was bedridden. I had the Epstein-Barr virus and chronic fatigue. Even the best herbal supplements didn't help. After the flush, the virus wasn't there and my chronic fatigue gone! I'm healthy as a horse. Over the years I passed over 750 stones.

When did you put patients on it?

Immediately. They were all jubilant because of how great they felt after the flush. It was like taking a large weight off them. I put 150 patients on the flush. I never had one who didn't benefit. Three cases of chronic fatigue who were bedridden are now fine. The flush also helped diabetic and cancer patients and a man with Parkinson's. Two patients said their vision improved. When you remove stones from the liver, every organ is healthier.

How many people have stones?

I have never found anyone who didn't. Everyone I put on the flush passed at least 100 to 300 stones. One man passed a monstrous 2 1/2 inch stone, very dark green, super saturated with bile. He was so pleased as he felt so much better.

Any downside to the flush?

The worst is getting the olive oil down, it can make you nauseous. Coke helps a lot. It also helps to get a good-grade of olive oil that is thin instead of thick. This helps it go down easier.

How often does one take the flush?

Many can be greatly helped by doing a flush every 3 to 4 months the first year. Then, never less than once a year.

COLON THERAPIST JULIA SMITH ON THE LIVER FLUSH.

"One stone was the size of a golf ball. The inside hard and white."

What comes out in a liver flush?

Liver and gall stones, often so coated with fungus you can hardly see the green. Also a lot of yellow acids. One person passed stones so large they clogged up the plumbing. My mother had a terrible gall bladder attack that almost killed her! She was scheduled for surgery. I said "No" and gave her the liver flush. She passed a stone as large as a golf ball. I dissected it and the inside was like hard, white plaster. She avoided surgery. To this day, she is fine.

Did you try the flush?

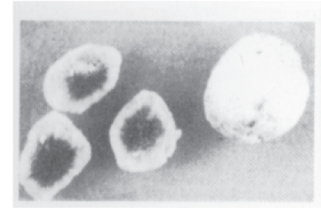

Yes. The day after the flush was the best I'd felt in 10 years. Before, I was losing my memory and it immediately came back like the old days. My mind was so sharp, hard to believe.

What do your patients notice?

Everyone feels better. The mind clears. They feel very alert, energetic. ***The liver flush is like magic!*** Hours after the flush, many people are reborn. The eyes sparkle, they come to life.

HEALTH CLINIC

Mr. Oberdorf, I am intrigued by the way you put together a basic foundation of information to help people reverse their health conditions.

MD, COMPLIMENTARY MEDICINE

"The liver flush is a godsend with nonsurgical relief."

Mr. Oberdorf, thanks again for your *True Health & Healing*. I have had excellent results with *Silver Water* for infection and pneumonia. The liver flush is a godsend with nonsurgical relief. After I, my wife and patients did it, I am convinced that it is safe and effective in cleansing the gallbladder, liver and entire body resulting in energy and stamina galore!

PAUL OBERDORF

Over *ten thousand people* have done the liver flush, and we estimate 95% passed stones. We regularly hear amazing stories of eliminating hundreds of stones, chaff and cholesterol. *Cholesterol crystals can be seen floating to the top*. Most memorable was a man who drove 200 miles to thank us for a friend who passed ONE THOUSAND STONES! The liver flush is truly magic -- it will clear up so many health dilemmas and make you feel great.

THE AMAZING LIVER CLEANSE by Andreas Moritz

This book addresses the most common, but rarely recognized cause of illness -- stones congesting the liver. Most adults, especially those suffering chronic illness, heart disease, arthritis, MS, cancer, diabetes have 100's if not 1000's of stones blocking the bile ducts. It explains what causes stones, what role they play in the most common diseases and instructions to painlessly remove them. It has led to extraordinary improvements in health and wellness for thousands of people.

Liver Flush Instructions

Note: Best results are obtained with a healthy, clean colon and 2 to 3 normal bowel movements daily. Use Jim Foley's Colon Pills and Colon Cleanse.

DAY 1: Mix 90 drops (level teaspoon) of *Super Phos 30* in one quart of apple juice and drink.

DAY 2: Mix 90 drops (level teaspoon) of *Super Phos 30* in one quart of apple juice and drink.

DAY 3: Mix 90 drops (level teaspoon) of *Super Phos 30* in one quart of apple juice and drink.

You *do not* have to drink it at one time. You can drink it in smaller doses throughout the day. Eat normally. This is not a fast. *Super phos 30* contains orthophosphoric acid and apple juice contains pectin, which help soften stones in the gallbladder and liver.

For diabetics, or if you cannot tolerate so much apple juice, use one quart of distilled water per day, and increase *Super Phos* from 90 drops to 120 drops daily.

* **DAY 3 EVENING:** Eat dinner. Wait a minimum three hours after dinner. Now prepare and drink the following liver flush mixture.

* **The liver flush mixture:** Thoroughly mix juice from one squeezed lemon with one cup of Coke Classic and one cup of extra virgin Olive Oil.

* **Quickly drink the mixture!** Do not wait or the oil will settle to the bottom. You will feel very full. If you have an oily feeling on lips or teeth, use lemon rind on them to relieve the oily feeling. The Coke is used to lessen nausea.

* **Immediately lie down** after drinking the flush mixture. Lie down on your **RIGHT SIDE** for a half hour (30 minutes). **NOT** less! It is best to draw your knees up to your chest (fetal position) so the oil will force the gall bladder and bile ducts to contract and throw off the stones. If you can't do this, lay stretched out full length. Stay in either position for 30 minutes.

After 30 minutes, you can move around and resume normal activity and then go to sleep. It will usually take up to 8 hours for the flush to work. It is a good idea to take an herbal laxative (Jim's Colon Pills) that evening or the next morning.

WHAT TO EXPECT: Considerable soft stool the first time. This will decrease and a more formed stool usually about the fifth time. Stones are not usually found with the first stool. Most come out in the second stool, maybe 5 to 8 hours later, and fewer stones with each additional stool. Reports range from under 100 to as many as 1,000. Stones will be somewhat soft and waxy green (like cooked peas). Stones are usually pea size, but can be as large as a golf ball.

Optional: Epsom salt can help relax the liver bile ducts. On Day 3, in the afternoon, mix one tablespoon of Epsom Salt in one cup of water. Drink. You may repeat this the next morning.

Repeat liver flush: About 3 to 4 times the first year, until very few stones come out. Then, do a liver flush at least once a year.

How to Keep Liver Bile Ducts Clean and Prevent Future Stones from Forming!

A teaspoon of *Olive Oil* a day will keep the liver bile ducts clean and prevent new stones from forming. It's that easy and works! Use extra virgin olive oil. Mixing it with juice from a lemon makes it easier to drink. Drink it in one shot or with meals, salads, etc. In Greece, they devour olive oil and the incidence of cancer is so much less than in America.
