Nickel is a carcinogen. Its toxicity and hazards are well documented.

Studies of industrial workers exposed to nickel show a huge increase in cancer. In fact, nickel is used by some cancer centers to induce cancer in lab animals.

Incredibly, this is the same nickel used by dentists in dental crowns, braces, amalgams and porcelain. And it's been seeping into your body for decades.

### The Real Cause of Hair Loss and Prostate Problems

Nickel does not belong in your body! As it accumulates, your skin oils can be loaded with nickel causing skin allergies and disorders, plus hair loss.

The other place nickel tends to build up is in your prostate.

Urinary tract bacteria love, need and

*"Nickel compounds have been unequivocally implicated as human respiratory carcinogens ... And there appears a relationship between nickel crowns and breast cancer in women."* --Dr. Thomas Levy, M.D.

*"I've treated terminal cancer in Germany for 40 years and turned around 24% of 16,000 patients by eliminating nickel."* -- Dr. Joseph Isseis, GDR

thrive on nickel. So they invade your nickel-rich prostate and massively reproduce. This swelling of bacteria is an underlying cause of prostate enlargement.

### Look and Feel Years Younger!

The main ingredient of *Nickel Reducer* is a powerful amino acid, L-histidine, that binds itself to nickel and flushes it out of your body.

Shortly after taking it, you know something is happening. Your skin and scalp are the first to experience nickel elimination, and hair starts returning in many thin areas quickly.

Carefully observe your hair, hairline and bald spots. You may see the difference in just days as you see existing hair start growing faster.

Better yet, you'll start seeing new hair in balding areas, and your receding hairline filling in. It gets better each day as more and more nickel leaves the body.

### Amazing Prostate Benefits!

Over time, as nickel is depleted, bacteria will not have their meal ticket anymore and will stop invading your prostate.

It will gradually shrink and heal, and your PSA will drop. Best of all, a healthy prostate means better sex and fewer bathroom runs.

Don't let nickel quietly poison your
